Next week or any time is good. Will be turning over to Wieber at some point anyway.

Tony,

So, I don't forget about this one more time, Kirstin Brown below has agreed to assist with this effort. Here existing knowledge of the area and being with DRMS (formerly DMG) provides great advantage to getting this started.

If you would let me know when you have some time to talk about coordinating with her, but more specifically providing her a template on structuring the data fields, etc. for our use in a Viewer type application.

Let me know -thanks,

Steve

**Subject:** What I started for Upper Animas

I will let you two decide what it is you want from DRMS and I will see if we can provide it easily.

I did put a lot of coordinates into GIS about 5 years ago, and that is what the images are showing. It would take me a while to figure out what sites I have in here, but initially it looks like I focused on DMG and WQCD data. The motivation of putting this data together was to come into compliance (on behalf of ARSG) with STORET by using the Colorado Data Sharing Network to upload.

Kirstin
